# INTRODUCING ORDINAND MANAGER

## *Efficient - Effective - evolved*

*Imagine being able to access accurate records of all your ordination candidates at the press of a button. Imagine knowing that the information you needed was at your fingertips, easy to get at and guaranteed to be as up-do-date as possible. No more trips to the Diocesan Office to hunt out the folder and then thumb through inches of paperwork.*

Just a dream? Not with Ordinand Manager, a new software package that is set to revolutionise the way candidates' records are held, accessed and updated.

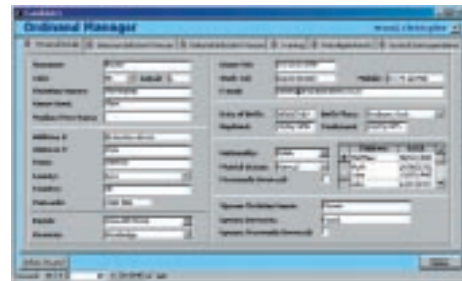

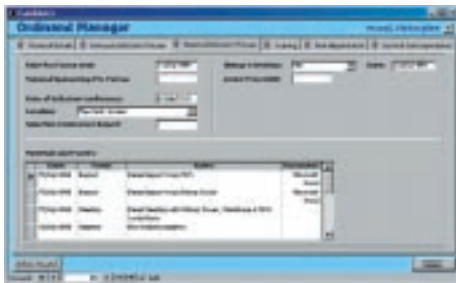

Bishops and Supervisors lead busy lives in today's 21st Century environment and deserve to be able to use modern technology in looking after their Ordinands. And that's where Ordinand Manager from evolve solutions ltd comes in.

Personal and supervisor details, Bishop, panel and candidate reports, training and grant

information, first Parish and Ordination details and the many other aspects that make up an Ordinand's file are all stored in a central computer with Ordinand Manager.

But that's only half the story. Those same details will also be instantly available to Supervisors when they log in on their own computers and synchronise with the central database. After they have accessed the records and met the candidate for themselves, their own report will become part of the database and will be synchronised ready for the next person who accesses that candidate's file.

Ordinand Manager allows technology to keep the records in place while the shepherds carry on with the more important job of tending their flock. Bishops and Supervisors can spend more time making personal contact with candidates and less time chasing paperwork - and that has to be good news for everybody.

Make the most of 21st Century technology and enjoy computer-stored records which can be accessed with a mouse click and updated just as easily. Look after your flock with Ordinand Manager from evolve solutions ltd.
